## aising BOYS

We have all heard statements about how difficult it can be to raise boys. But is there really a cause for concern? This seminar looks at ways in which boys can be raised to fulfill their potential. How should we manage conflict and aggression? How can we help them to grow and learn? What are the best ways to talk to them? How do we encourage empathy and respect for self, others and environment/society? How do we set firm consistent limits to encourage responsibility, whilst balancing this with love and quality of relationships? Hear about how to help boys to develop the 3 R's as well as the skills to communicate their thoughts and feelings.

R's*
